Greenock Mill circa 1880's prior to Friedrich Laucke's purchase of the mill from CHR Finck in 1899.

The large chimney on the right was destroyed in 1905 by a boiler explosion.

AN AUSTRALIAN FAMILY TRADITION

Laucke Mills are one of Australia's oldest family owned and operated milling companies, that was founded by Friedrich Laucke on the 1st of June 1899, at Greenock, in South Australia's famous Barossa Valley.

Hard work and a dedication to quality, service and reliability built Friedrich's business and earned him the loyalty of his customers.

In an industry dominated by large corporate conglomerates Laucke Feed Mills is still wholly owned and operated by the Laucke family.

While many aspects of business have changed over time the values of integrity, quality, service and reliability established by Friedrich Laucke remain as important today as they were 100 years ago.

Calf Starter Meal

Calf Starter Meal is a palatable and nutritious food formulated to be fed to calves from birth to three months of age. It provides the necessary nutritional requirements of the pre-ruminant calf to promote rapid and healthy rumen development.

It is nutritionally balanced for essential nutrients such as protein, energy, vitamins, minerals and acidifiers, and contains lasalocid sodium for improved growth rates and feed conversion efficiency and as an aid in the prevention of coccidiosis.

FEEDING RECOMMENDATIONS

Feed **Calf Starter Meal** *ad lib.* from birth to 3 months of age.

Milk can be withdrawn from 5 to 6 weeks of age if calves are consistently consuming 1kg to 1.5kg of **Calf Starter Meal** per day.

From 3 to 6 months of age feed **Calf Weaner Pellets**.

To maximise consumption and to help avoid digestive problems ensure that **Calf Starter Meal** is fed fresh daily.

Roughage and clean, fresh water must be available at all times.

WARNINGS

This feed contains Lasalocid Sodium.

Do not feed to horses or other equines, camelids and canines as it may be fatal.

Withholding Period - Cattle: Nil.

INGREDIENTS

Calf Starter Meal is formulated from a selection of the following ingredients: Barley, wheat, triticale, oats, peas, lupins, lentils, beans, soyabean, canola, sunflower, grapes and products derived from these ingredients. Vegetable oil, molasses, limestone, di-calcium phosphate, salt, rumen buffer, bentonite, magnesium oxide, acidifier, lysine, methionine, antioxidants and lasalocid sodium.

Vitamins: A, D3, E, K, B1 (thiamine), B2 (riboflavin), B3 (niacin), B5 (pantothenate), B6 (pyridoxine), B7 (biotin), B9 (folic acid), B12 (cobalamin) and choline.

Minerals: Calcium, phosphorus, sodium, chloride, cobalt, copper, iodine, iron, magnesium, manganese, molybdenum, selenium and zinc.

ANALYSIS

| | As fed | DM @ 89% |
|-------------------------|--------------|--------------|
| PROTEIN (min) | 19.0% | 21.3% |
| FAT (min) | 3.0% | 3.4% |
| FIBRE (max) | 9.0% | 10.1% |
| SALT (max added) | 1.0% | 1.1% |
| RUMEN BUFFER | 0.5% | 0.6% |

Lasalocid Sodium 46 mg per kg as fed

Calf Weaner Pellets

Calf Weaner Pellets are a palatable and nutritious food formulated to be fed to calves from three to six months of age. It is nutritionally balanced for essential nutrients such as protein, energy, vitamins and minerals, and contains lasalocid sodium for improved growth rates and feed conversion efficiency and as an aid in the prevention of coccidiosis.

FEEDING RECOMMENDATIONS

Feed **Calf Starter Meal** *ad lib.* from birth to 3 months of age.

From 3 to 6 months of age feed **Calf Weaner Pellets**.

Note: **Calf Weaner Pellets** can be fed from birth as a low cost alternative to **Calf Starter Meal**, however growth rates may be slower.

To maximise consumption and to help avoid digestive problems ensure that **Calf Weaner Pellets** are fed fresh daily.

Roughage and clean, fresh water must be available at all times.

WARNINGS

This feed contains Lasalocid Sodium.

Do not feed to horses or other equines, camelids and canines as it may be fatal.

Withholding Period - Cattle: Nil.

INGREDIENTS

Calf Weaner Pellets are formulated from a selection of the following ingredients: Barley, wheat, triticale, oats, peas, lupins, lentils, beans, soyabean, canola, sunflower, grapes and products derived from these ingredients. Vegetable oil, molasses, limestone, di-calcium phosphate, salt, rumen buffer, bentonite, magnesium oxide, methionine, antioxidants and lasalocid sodium.

Vitamins: A, D3, E, K, B1 (thiamine), B2 (riboflavin), B3 (niacin), B5 (pantothenate), B6 (pyridoxine), B7 (biotin), B9 (folic acid), B12 (cobalamin) and choline.

Minerals: Calcium, phosphorus, sodium, chloride, sulphur, cobalt, copper, iodine, iron, magnesium, manganese, molybdenum, selenium and zinc.

ANALYSIS

| | As fed | DM @ 89% |
|-------------------------|--------------|--------------|
| PROTEIN (min) | 18.0% | 20.2% |
| FAT (min) | 2.5% | 2.8% |

| RUMEN BUFFER | 0.7% | 0.8% |

Lasalocid Sodium 46 mg per kg as fed

Beef Weaner Pellets

Beef Weaner Pellets are formulated to be fed to weaners between 125kg to 300kg live weight to maintain growth rates in situations where forage quality and/or quantity is limiting. It is nutritionally balanced for essential nutrients such as protein, energy, vitamins and minerals, and contains lasalocid sodium for improved growth rates and feed conversion efficiency and as an aid in the prevention of coccidiosis.

FEEDING RECOMMENDATIONS

Feed *ad lib.* or restrict if necessary. Introduce **Beef Weaner Pellets** gradually and avoid sudden changes to diet as digestive problems may occur. If digestive problems occur reduce the amount of pellets being fed and increase roughage consumption until normal digestive activity returns.

Stock will consume approximately 3% to 3.5% of their body weight of food per day. When fed in a feed-lot situation (*ad lib.*) about 15% to 25% of their consumption will be roughage and the remainder pellets. Roughage intake can be manipulated by alternating between straw and clean, fresh hay. The consumption of straw will generally be lower than hay which enables the level of consumption to be regulated.

Roughage and clean, fresh water must be available at all times.

WARNINGS

This feed contains Lasalocid Sodium.

Do not feed to horses or other equines, camelids and canines as it may be fatal.

Withholding Period - Cattle: Nil.

INGREDIENTS

Beef Weaner Pellets are formulated from a selection of the following ingredients: Barley, wheat, triticale, oats, peas, lupins, lentils, beans, soyabean, canola, sunflower, almonds, grapes and products derived from these ingredients. Vegetable oil, limestone, di-calcium phosphate, salt, urea, rumen buffer, bentonite, magnesium oxide, antioxidants and lasalocid sodium.

Vitamins: A, D3, E. **Minerals:** Calcium, phosphorus, sodium, chloride, sulphur, cobalt, copper, iodine, magnesium, manganese, selenium and zinc.

ANALYSIS

Sheep & Cattle Nuts

Sheep & Cattle Nuts are formulated to be fed to sheep & cattle to maintain body weight and condition in situations where forage quality and or quantity is limiting.

FEEDING RECOMMENDATIONS

The feeding rate of **Sheep & Cattle Nuts** will vary depending on a number of factors such as body weight and condition, pregnancy, lactation (level of milk production), activity and quality of the roughage being fed.

Generally **Sheep & Cattle Nuts** would be fed between 0.5% to 2% of body weight per day along with *ad lib.* roughage.

Introduce **Sheep & Cattle Nuts** gradually and avoid sudden changes to diet as digestive problems may occur. If digestive problems occur reduce the amount of nuts being fed and increase roughage consumption until normal digestive activity returns.

Roughage and clean, fresh water must be available at all times.

INGREDIENTS

Sheep & Cattle Nuts are formulated from a selection of the following ingredients: Barley, wheat, triticale, oats, peas, lupins, lentils, beans, soyabean, canola, sunflower, almonds, grapes and products derived from these ingredients. Vegetable oil, limestone, di-calcium phosphate, salt, rumen buffer, bentonite, magnesium oxide and antioxidants.

Vitamins: A, D3, E. **Minerals:** Calcium, phosphorus, sodium, chloride, sulphur, cobalt, copper, iodine, iron, magnesium, manganese, selenium and zinc.

ANALYSIS

| | As fed | DM @ 89% |

| PROTEIN (min) | 13.0% | 14.6% |
| FAT (min) | 2.0% | 2.2% |
| FIBRE (max) | 12.0% | 13.5% |
| SALT (max added) | 1.0% | 1.1% |
| RUMEN BUFFER | 1.0% | 1.1% |

Ewe & Lamb Nuts

Ewe & Lamb Nuts are formulated to be fed to ewes from one month before lambing and during lactation to maintain body condition and promote milk production in the ewe. Increased lactation will increase lamb growth and survival.

Lasalocid sodium is included in **Ewe & Lamb Nuts** to improve feed conversion efficiency and as an aid in the prevention of coccidiosis.

FEEDING RECOMMENDATIONS

The feeding rate of **Ewe & Lamb Nuts** will vary depending on a number of factors such as body weight and condition, pregnancy, lactation (level of milk production), activity and quality of the roughage being fed.

Generally **Ewe & Lamb Nuts** would be fed between 0.5% to 2% of body weight per day along with *ad lib.* roughage.

Introduce **Ewe & Lamb Nuts** gradually and avoid sudden changes to diet as digestive problems may occur. If digestive problems occur reduce the amount of nuts being fed and increase roughage consumption until normal digestive activity returns.

Ewe & Lamb Nuts can be fed to cows and calves.

Roughage and clean, fresh water must be available at all times.

WARNINGS

This feed contains Lasalocid Sodium. Do not feed to horses or other equines, camelids and canines as it may be fatal. Withholding Periods - Meat: Cattle & Sheep, Nil. Milk: Cattle, Nil. Sheep, Do not use in lactating ewes which are producing or may in the future produce milk that may be used or processed for human consumption.

INGREDIENTS

Ewe & Lamb Nuts are formulated from a selection of the following ingredients: Barley, wheat, triticale, oats, peas, lupins, lentils, beans, soyabean, canola, sunflower, almonds, grapes and products derived from these ingredients. Vegetable oil, limestone, di-calcium phosphate, salt, rumen buffer, bentonite, ammonium chloride, magnesium oxide, antioxidants and lasalocid sodium.

Vitamins: A, D3, E. **Minerals:** Calcium, phosphorus, sodium, chloride, sulphur, cobalt, copper, iodine, iron, magnesium, manganese, selenium and zinc.

ANALYSIS

| | As fed | DM @ 89% |

Lasalocid Sodium 40 mg per kg as fed

Grain Balancer 60

Grain Balancer 60 Pellets are designed to be mixed with cereal grains and legumes to produce a balanced feed-lot diet for cattle and sheep.

MIXING INSTRUCTIONS

Balancer 60 Pellets are mixed at the rate of 6% (60kg per tonne) of the total grain mix. The level of legumes required in the mix will vary depending upon the protein level of the diet required. Legumes can be replaced with other protein sources such as canola meal, cottonseed meal, etc. if economical to do so.

To ensure your diet is balanced correctly it is recommended that you contact our technical staff so a least cost diet can be formulated for you using the ingredients that you have available.

The two examples below show barley, lupins and balancer being used to create two feed-lot diets, one 14% protein, the other 16% protein at 11.7mj/kg on an "as fed" basis.

| Grain Balancer 60 | Barley | Lupins | Diet Protein | Diet Energy |
|-------------------|--------|--------|--------------|-------------|
| 6% | 80% | 14% | 14% | 11.7mj/kg |
| 6% | 70% | 24% | 16% | 11.7mj/kg |

FEEDING RECOMMENDATIONS

Feed the mixture of grain and balancer *ad lib.* along with roughage. Introduce gradually and avoid sudden changes to diet as digestive problems may occur. If digestive problems occur reduce grain and balancer mix, and increase roughage until normal digestive activity returns.

Stock will consume approximately 3% to 3.5% of their body weight of food per day. When fed in a feed-lot situation (*ad lib.*) about 15% to 25% of their consumption will be roughage, and the remainder grain and balancer mix. Roughage intake can be manipulated by alternating between straw and clean, fresh hay. The consumption of straw will generally be lower than hay which enables the level of consumption to be regulated.

Roughage and clean, fresh water must be available at all times.

Lasalocid Sodium 550 mg per kg as fed

WARNINGS

This feed contains Lasalocid Sodium. Do not feed to horses or other equines, camelids and canines as it may be fatal.

Withholding Periods - Meat: Cattle & Sheep, Nil. Milk: Cattle, Nil. Sheep, Do not use in lactating ewes which are producing or may in the future produce milk that may be used or processed for human consumption.

INGREDIENTS

Grain Balancer 60 is formulated from a selection of the following ingredients: Canola, soyabean, legumes, cereal grains, grapes and products derived from these ingredients. Vegetable oil, limestone, di-calcium phosphate, salt, urea, rumen buffer, magnesium oxide, antioxidants and lasalocid sodium.

Vitamins: A, D3, E. **Minerals:** Calcium, phosphorus, sodium, chloride, sulphur, cobalt, copper, iodine, iron, magnesium, manganese, selenium and zinc.

Stock Nuts

Stock Nuts are formulated to be fed to a range of animals as follows: Cattle (beef & dairy), sheep, goats, deer and camelids (alpacas & llamas). They are designed to cover the nutritional requirements of pregnancy, lactation and growth from approximately three months of age and are also an ideal diet for maintenance.

FEEDING RECOMMENDATIONS

The feeding rate of **Stock Nuts** will vary depending on a number of factors such as body weight and condition, pregnancy, lactation (level of milk production), activity and quality of the roughage being fed.

Generally the total daily feed consumption, including roughage, will be between 2% to 3.5% of body weight for cattle, sheep, goats and deer. Alpacas and llamas consume less, being approximately 1.2% to 2.5% of body weight.

Consumption of **Stock Nuts** will generally be between 10% and 75% of the total feed consumed.

Introduce **Stock Nuts** gradually and avoid sudden changes to diet as digestive problems may occur. If digestive problems occur reduce the amount of nuts being fed and increase roughage consumption until normal digestive activity returns.

When feeding alpacas and llamas be aware they are prone to choke if they consume food too quickly. Feed in a manner that will slow their rate of consumption.

Roughage and clean, fresh water must be available at all times.

INGREDIENTS

Stock Nuts are formulated from a selection of the following ingredients: Barley, wheat, triticale, oats, peas, lupins, lentils, beans, soyabean, canola, sunflower, almonds, grapes and products derived from these ingredients. Vegetable oil, limestone, di-calcium phosphate, salt, rumen buffer, bentonite, ammonium chloride, magnesium oxide and antioxidants.

Vitamins: A, D3, E. **Minerals:** Calcium, phosphorus, sodium, chloride, sulphur, cobalt, copper, iodine, iron, magnesium, manganese, selenium and zinc.

ANALYSIS

|-------------------------|--------|----------|
| PROTEIN (min) | 15.0% | 16.9% |
| FAT (min) | 2.0% | 2.2% |
| FIBRE (max) | 10.0% | 11.2% |
| SALT (max added) | 1.2% | 1.3% |
| RUMEN BUFFER | 1.0% | 1.1% |

Goat Pellets

Goat Pellets are a nutritious food formulated to be fed to growing and lactating goats and is also an ideal diet for maintenance.

It is nutritionally balanced for essential nutrients such as protein, energy, vitamins and minerals.

FEEDING RECOMMENDATIONS

The feeding rate of **Goat Pellets** will vary depending on a number of factors such as body weight and condition, pregnancy, lactation (level of milk production), activity and quality of the roughage being fed.

Generally total daily feed consumption, including roughage, will be between 2% and 3.5% of body weight.

Consumption of **Goat Pellets** will generally be between 10% and 75% of the total feed consumed.

Introduce **Goat Pellets** gradually and avoid sudden changes to diet as digestive problems may occur. If digestive problems occur reduce the amount of pellets being fed and increase roughage consumption until normal digestive activity resumes.

MULTI PURPOSE

Goat Pellets are a well-balanced nutritious food that can be fed to other stock such as sheep, cattle, alpaca and deer. Feeding recommendations are similar to those above.

Roughage and clean fresh water must be available at all times.

INGREDIENTS

Goat Pellets are formulated from a selection of the following ingredients: Barley, wheat, triticale, oats, peas, lupins, lentils, beans, soyabean, canola, lucerne, almonds, grapes, sunflower and products derived from these ingredients. Vegetable oil, limestone, di-calcium phosphate, salt, rumen buffer, bentonite, ammonium chloride, magnesium oxide and antioxidants.

Vitamins: A, D3, E. **Minerals:** Calcium, phosphorus, sodium, chloride, cobalt, copper, iodine, iron, magnesium, manganese, sulphur, selenium and zinc.

ANALYSIS

| | As fed | DM @ 89% |
|-------------------------|--------|----------|
| PROTEIN (min) | 15.0% | 16.9% |
| FAT (min) | 3.2% | 3.6% |

| RUMEN BUFFER | 1.0% | 1.1% |

Goat Blend

Goat Blend is a nutritious food formulated to be fed to growing and lactating goats, and is also an ideal diet for maintenance.

Goat Blend is a mix of grains and pellets coated in molasses and vegetable oil.

FEEDING RECOMMENDATIONS

The feeding rate of **Goat Blend** will vary depending on a number of factors such as body weight and condition, pregnancy, lactation (level of milk production), activity and quality of the roughage being fed.

Generally total daily feed consumption, including roughage, will be between 2% to 3.5% of body weight.

Consumption of **Goat Blend** will generally be between 10% and 75% of the total feed consumed.

Introduce **Goat Blend** gradually and avoid sudden changes to diet as digestive problems may occur. If digestive problems occur reduce the amount of blend being fed and increase roughage consumption until normal digestive activity returns.

DUAL PURPOSE

Goat Blend is a well-balanced nutritious food that can be fed to other ruminants such as cattle and deer. Feeding recommendations are similar to those above.

Roughage and clean, fresh water must be available at all times.

INGREDIENTS

Goat Blend is formulated from a selection of the following ingredients: Barley, wheat, triticale, oats, peas, lupins, lentils, beans, soyabean, canola, sunflower, grapes and products derived from these ingredients. Molasses, vegetable oil, limestone, di-calcium phosphate, salt, rumen buffer, bentonite, ammonium chloride, magnesium oxide and antioxidants.

Vitamins: A, D3, E. **Minerals:** Calcium, phosphorus, sodium, chloride, sulphur, cobalt, copper, iodine, iron, magnesium, manganese, selenium and zinc.

ANALYSIS

| | As fed | DM @ 89% |
|-------------------------|--------|----------|
| PROTEIN (min) | 15.0% | 16.9% |
| FAT (min) | 3.0% | 3.4% |
| FIBRE (max) | 10.0% | 11.2% |
| SALT (max added) | 1.2% | 1.3% |
| RUMEN BUFFER | 1.0% | 1.1% |

Alpaca Blend

Alpaca Blend is a nutritious food formulated to be fed to growing and lactating alpacas and llamas, and is also an ideal diet for maintenance.

Alpaca Blend is a mix of grains and pellets coated in molasses and vegetable oil.

FEEDING RECOMMENDATIONS

Generally an alpaca's total daily feed consumption will be between 1.2% to 1.5% of body weight for maintenance, 1.5% to 2.5% growing, 1.5% to 2% late gestation and 1.5% to 3% during lactation. The level of blend fed will vary depending on a number of factors such as body weight and condition, pregnancy, lactation (level of milk production), activity and quality of the roughage being fed. The portion of blend fed will generally vary between 10% and 75% of total daily feed intake. Roughage is an important part of their daily intake and must be available at all times.

Introduce **Alpaca Blend** gradually and avoid sudden changes to diet as digestive problems may occur. If digestive problems occur reduce the amount of blend being fed and increase roughage consumption until normal digestive activity returns.

When feeding alpacas and llamas be aware that they are prone to choke if they consume food too quickly. Feed in a manner that will slow their rate of consumption.

DUAL PURPOSE

Alpaca Blend is a well-balanced nutritious food that can be fed to other ruminants such as sheep, cattle, goats and deer.

Roughage and clean, fresh water must be available at all times.

ANALYSIS

| | As fed | DM @ 89% |
|------------------|--------|----------|
| PROTEIN (min) | 15.0% | 16.9% |
| FAT (min) | 3.0% | 3.4% |
| FIBRE (max) | 10.0% | 11.2% |
| SALT (max added) | 1.2% | 1.3% |
| RUMEN BUFFER | 1.0% | 1.1% |

INGREDIENTS

Alpaca Blend is formulated from a selection of the following ingredients: Barley, wheat, triticale, oats, peas, lupins, lentils, beans, soyabean, canola, sunflower, grapes and products derived from these ingredients. Molasses, vegetable oil, limestone, di-calcium phosphate, salt, rumen buffer, bentonite, ammonium chloride, magnesium oxide and antioxidants.

Vitamins: A, D3, E. **Minerals:** Calcium, phosphorus, sodium, chloride, sulphur, cobalt, copper, iodine, iron, magnesium, manganese, selenium and zinc.

Roo Food

Roo Food is a nutritious diet formulated to be fed to kangaroos and wallabies.

It is a complete diet that requires no other supplementary feeding other than roughage and clean, fresh water.

FEEDING RECOMMENDATIONS

Feed **Roo Food** *ad lib.* along with roughage.

Introduce **Roo Food** gradually and avoid sudden changes to diet as digestive problems may occur. If digestive problems occur reduce the amount of **Roo Food** being fed and increase roughage consumption until normal digestive activity returns.

Roughage and clean, fresh water must be available at all times.

INGREDIENTS

Roo Food is formulated from a selection of the following ingredients: Clover, lucerne, barley, wheat, triticale, oats, peas, lupins, lentils, beans, soyabean, canola, sunflower, almonds, grapes and products derived from these ingredients. Vegetable oil, lignin, limestone, di-calcium phosphate, magnesium oxide, salt, bentonite, enzymes and antioxidants.

Vitamins: A, D3, E, B1 (thiamine), B2 (riboflavin), B5 (pantothenate), B6 (pyridoxine), B7 (biotin), B9 (folic acid), B12 (cobalamin) and choline.

Minerals: Calcium, phosphorus, sodium, chloride, sulphur, cobalt, copper, iodine, iron, magnesium, manganese, selenium and zinc.

ANALYSIS (as fed)

Piglet 800 MP Starter

Piglet 800 MP Starter is a highly digestible and palatable early weaning piglet starter food which is micro-pelleted for improved feed consumption.

It contains digestive enzymes, feed acidifiers, yeast extracts, dextrose, emulsifiers, feed flavours, zinc oxide and an extensive vitamin and trace mineral premix to enhance growth, health and improve food digestibility.

A major advantage of the micro-pelleting process compared to extruded and mash feeds is that the physical density is increased which is important as the gut capacity of a young piglet is a limiting factor to its nutrient intake.

FEEDING RECOMMENDATIONS

Feed **Piglet 800 MP Starter** *ad lib.* from birth to 5 weeks of age.

From 5 to 7 weeks feed 60% **Pig Grower Pellets** and 40% **Piglet 800 MP Starter** mixture.

From 7 to 10 weeks feed 75% **Pig Grower Pellets** and 25% **Piglet 800 MP Starter** mixture.

From 10 to 18 weeks feed **Pig Grower Pellets**.

From 18 weeks to market feed **Pig Finisher Pellets**.

To maximise consumption and to help avoid digestive problems ensure that **Piglet 800 MP Starter** is fed fresh daily.

INGREDIENTS

Piglet 800 MP Starter is formulated from a selection of the following ingredients: Cooked cereals, wheat, legumes, soyabean, canola and products derived from these ingredients. Whey, dextrose, fish meal, meat meal, blood meal, fat, lysine, methionine, threonine, tryptophan, isoleucine, valine, dicalcium phosphate, bentonite, salt, zinc oxide, enzymes, emulsifiers, yeast extracts, flavours, feed acidifiers and antioxidants.

Vitamins: A, D3, E, K, B1 (thiamine), B2 (riboflavin), B3 (niacin), B5 (pantothenate), B6 (pyridoxine), B7 (biotin), B9 (folic acid), B12 (cobalamin) and choline.

Minerals: Calcium, phosphorus, sodium, chloride, chromium, cobalt, copper, iron, iodine, manganese, molybdenum, selenium and zinc.

Pig Grower Pellets

Pig Grower is a quality pig grower food formulated to be fed to growing pigs from 10 weeks of age. It is nutritionally balanced for essential nutrients to ensure strong, healthy growth, economical feed conversion and high lean meat yield.

FEEDING RECOMMENDATIONS

Feed **Pig Grower Pellets** *ad lib.* from 10 weeks of age until market or alternatively go onto **Pig Finisher Pellets** at 18 weeks and feed through to market.

INGREDIENTS

Pig Grower Pellets are formulated from a selection of the following ingredients: Wheat, triticale, barley, oats, peas, lupins, beans, lentils, canola, soyabean, almonds and products derived from these ingredients. Meat meal, blood meal, fish meal, fat, limestone, dicalcium phosphate, salt, lysine, methionine, threonine, tryptophan, isoleucine, valine, enzymes and antioxidants.

Vitamins: A, D3, E, K, B1 (thiamine), B2 (riboflavin), B3 (niacin), B5 (pantothenate), B6 (pyridoxine), B7 (biotin), B9 (folic acid), B12 (cobalamin) and choline.

Minerals: Calcium, phosphorus, sodium, chloride, chromium, cobalt, copper, iodine, iron, manganese, selenium and zinc.

Suis 50% Pig Concentrate

Suis 50% Pig Concentrate will provide a balanced pig grower diet when mixed with on farm grains. **Suis 50% Pig Concentrate** contains essential nutrients such as protein, energy, vitamins and minerals for strong and healthy growth.

MIXING INSTRUCTIONS

Suis 50% Pig Concentrate should be mixed with rolled or crushed grains at a ratio of 15% concentrate to 85% grain.

A variety of grains and legumes can be mixed with **Suis 50% Pig Concentrate** and the types and quantities of each grain used will determine the final nutritional makeup of the diet.

For further information on mixing please contact our technical personnel.

INGREDIENTS

Suis 50% Pig Concentrate is formulated from a selection of the following ingredients: Meat meal, blood meal, fish meal, canola meal, soyabean meal, fat, limestone, dicalcium phosphate, salt, lysine, methionine, threonine, tryptophan, isoleucine, valine, enzymes and antioxidants.

Vitamins: A, D3, E, K, B1 (thiamine), B2 (riboflavin), B3 (niacin), B5 (pantothenate), B6 (pyridoxine), B12 (cobalamin) and choline.

Minerals: Calcium, phosphorus, sodium, chloride, chromium, cobalt, copper, iodine, iron, manganese, selenium and zinc.

Kat'z Korner

Kat'z Korner's is an ideal blend of moisture and odour absorbent ingredients producing an effective and economical cat litter.

Kat'z Korner's granular texture reduces tracking, clumps together for easy removal from the litter tray and absorbs unpleasant odours.

TO ENSURE BEST RESULTS

Place approximately 5cm of **Kat'z Korner** in a cat litter tray.

Gently shake the tray so the fine parts of the litter go below the surface. This will reduce tracking and also aid in trapping moisture beneath the surface.

LITTER BOX LOCATION

Put the litter tray in an easily accessible location away from noisy, high traffic areas. Dogs and young children should be kept away from this area.

CLEAN REGULARLY

Scoop out soiled material on a regular basis. Wash the litter tray when replacing with fresh litter.

DISPOSAL

Kat'z Korner is earth friendly and biodegradable, and can easily be disposed of in the garden as mulch.

INGREDIENTS

Products produced from grains, hay and wood, along with odour and moisture absorbents.

OJ' Jacks Premium Rabbit Pellets

OJ' Jacks Premium Rabbit Pellets are a nutritious and palatable food that is specially formulated for growing, breeding and lactating rabbits and is also an ideal food for pets.

FEEDING RECOMMENDATIONS

OJ' Jacks Premium Rabbit Pellets are a complete food, no other supplementary feeding is required.

Feed *ad lib.* along with cool, clean, fresh water.

Do not make sudden changes in diet as digestive problems may occur.

Grass and hay may be fed along with **OJ' Jacks Pellets** if desired.

INGREDIENTS

OJ' Jacks Premium Rabbit Pellets are formulated from a selection of the following ingredients: Clover, lucerne (alfalfa), barley, triticale, wheat, oats, lupins, peas, beans, lentils, canola, soya, sunflower, almonds and products derived from the above. Vegetable oil, lignin, di-calcium phosphate, limestone, bentonite, salt, lysine, methionine, threonine, tryptophan, magnesium oxide, enzymes and antioxidants.

Vitamins: A, D3, E, K, B1 (thiamine), B2 (riboflavin), B3 (niacin), B5 (pantothenate), B6 (pyridoxine), B7 (biotin), B9 (folic acid), B12 (cobalamin) and choline.

Minerals: Calcium, phosphorus, sodium, chloride, cobalt, copper, iodine, iron, magnesium, manganese, molybdenum, selenium and zinc.

Uncle Alber's, Great Barko & Dib's

BALANCED AND COMPLETE FOODS

Uncle Alber's, Great Barko & Dib's are nutritious and palatable diets for your dog. The quality recipes and exacting nutritional specifications ensure your dog receives all essential nutrients that are required to maintain health and vitality.

You will notice by volume that **Uncle Alber's, Great Barko & Dib's** are heavier than many dry dog foods, as during the manufacturing process the ingredients are compressed tightly together into crunchy bite size pieces. The dense nature of these aid in oral hygiene, as their gentle but coarse texture massage and clean teeth and gums. This assists in the removal of plaque, which is a precursor to gingivitis and periodontal disease.

FEEDING GUIDE

Introduce gradually and increase the amount fed over a number of days.

These feeding recommendations are a guide only and will vary depending on activity level, breed and weather conditions.

As a general guide, small dogs will consume approximately 1.5% of bodyweight and large dogs around 1% of bodyweight.

Very active dogs may require up to twice the normal amount and lactating bitches two to three times the normal amount. Adjust the amount fed based upon the body condition of your dog.

INGREDIENTS

Uncle Alber's, Great Barko & Dib's are formulated from a selection of the following ingredients: Pasta, lamb, beef, chicken and pork meal, fishmeal, fish oil, vegetable oil, fat from lamb, beef, chicken and pork. Products derived from wheat, canola and soybeans. Turmeric, basil, sage, natural flavours, bentonite, salt, digestive enzymes and antioxidants. Lysine, methionine, threonine, tryptophan, isoleucine and valine. **Vitamins:** A (8,000 iu/kg), D3 (800 iu/kg), E (100 mg/kg), K, B1 (thiamine, 2 mg/kg), B2 (riboflavin, 5 mg/kg), B3 (niacin), B5 (pantothenate), B6 (pyridoxine), B7 (biotin, 200 µg/kg), B9 (folic acid), B12 (cobalamin) and choline chloride. **Minerals:** Calcium, phosphorus, sodium, chloride, cobalt, copper, iodine, iron, manganese, organic selenium and zinc.
