

Full Feed 9934 Sheep NG

Full Feed 9934 Sheep NG Pellets are formulated to be fed to sheep for maintenance, particularly for a situation where forage is in short supply, and/or poor quality. It is also recommended to be fed to rams 4 to 8 weeks prior to mating and used as a supplement prior to and during lambing to reduce the likelihood of pregnancy toxæmia. Lasalocid sodium is included in the pellets to improve feed conversion efficiency and as an aid in the prevention of coccidiosis.

FEEDING RECOMMENDATIONS

This diet has been formulated to be fed to sheep as a full feed, no additional roughage is required other than during the introductory period.

Prior to introduction ensure that sheep are well fed with hay so as to avoid over consumption during the first few days. Palatable hay should be available ad lib. initially, then phased out during the first week providing sheep are not showing signs of digestive disturbance. Subsequently the pellets must be available at all times. If the pellets are allowed to run out, it will be necessary to repeat the introduction process.

The sheep must be monitored for signs of digestive problems on a daily basis. If digestive problems are observed resume feeding hay until normal digestive activity resumes.

Ensure that clean cool water is available at all times and that adequate feed and watering space is available.

It is recommended that all stock have their clostridial vaccinations up to date.

For additional information please contact Laucke Mills.

ANALYSIS

	As Fed	DM @ 89 %
ME (min)	10.0 MJ/kg	11.2 MJ/kg
TOTAL PROTEIN (min)	14.0 %	15.7 %
PROTEIN FROM UREA (max)	2.8 %	3.2 %
Urea (max)	1.0 %	1.1 %
SALT (max added)	1.0 %	1.1 %
Calcium	1.4 %	1.6 %
Phosphorous	0.4 %	0.45 %
Magnesium	0.2 %	0.22 %
ACID BUF (rumen buffer)	0.9 %	1.0 %

Lasalocid Sodium 34 mg per kg as fed

INGREDIENTS

Full Feed 9934 Sheep NG Pellets are formulated from a selection of the following ingredients: Barley, wheat, triticale, oats, peas, lupins, lentils, beans, soyabean, canola, sunflower and products derived from these ingredients.

Vegetable oil, molasses, limestone, bentonite, salt di-calcium phosphate, urea, acid buf, ammonium chloride magnesium oxide, antioxidants and lasalocid sodium.

Vitamins: A, D₃, E.

Minerals: Calcium, phosphorus, sodium, chloride, cobalt, copper, iodine, iron, manganese, selenium and zinc.

WARNINGS

Do not feed to camelids, horses or other equines as it may be fatal.

Withholding Period - Meat: Sheep, Nil. Milk: Sheep, Do not use in lactating ewes where milk or milk products may be used for human consumption.

This feed has been manufactured specifically for animals as described, do not feed to any other species of animal.

THIS PRODUCT DOES NOT CONTAIN RESTRICTED ANIMAL MATERIAL
