

Peak-Lay Phase 2

Peak-Lay Phase 2 is a high quality commercial layer feed, formulated to be fed to layer hens in middle to late lay. It is nutritionally balanced for energy, essential amino acids, calcium, phosphorus, vitamins and minerals essential to egg production.

Natural pigments derived from marigold and paprika are utilised to ensure a vibrant yolk colour.

* This feed is only available in bulk.

FEEDING & MANAGEMENT SUGGESTIONS

Peak-Lay Phase 2 Pellets should be available to the hens *ad lib.* along with clean, cool, fresh water.

MOULTING & DAY LENGTH

Laying hens have a natural response to day length which can result in reduced production around the shortest days of the year. In some circumstances laying may stop all together and hens will go into a moult. During a moult a hen will stop laying, shed large amounts of feathers and grow new feathers. As the day length increases and the moult finishes the hen will normally begin a new cycle of egg production.

It is possible to limit loss of production due to short day length by using artificial lighting in the hen house to create a constant day length (approximately 16 hours).

Using a simple timer, lights can be turned on and off automatically.

ANALYSIS

	As Fed
ME Poultry (min)	2750 kcal/kg
Protein (min)	16.0 %
Fat (min)	4.0 %
Fibre (max)	6.0 %
Lysine (min)	0.83 %
Methionine (min)	0.39 %
Linoleic acid (min)	1.5 %
Calcium (min)	4.3 %
Available Phosphorus (min)	0.36 %

INGREDIENTS

Peak-Lay Phase 2 Pellets are formulated from a selection of the following ingredients: barley, wheat, triticale, oats, peas, lupins, lentils, beans, soyabean, canola, sunflower and products derived from these ingredients.

Meat & bone meal, blood meal, fat, vegetable oil, lysine, methionine, threonine, tryptophan, antioxidant, enzymes, limestone, potassium carbonate, sodium bicarbonate, di-calcium phosphate, salt, bentonite and natural yolk colour.

Vitamins: A, D₃, E, K, riboflavin (B₂), niacin (B₃), pantothenate (B₅), pyridoxine (B₆), biotin (B₇), folic acid (B₉), cobalamin (B₁₂) and choline.

Minerals: Calcium, phosphorus, sodium, chloride, potassium, cobalt, copper, iodine, iron, manganese, molybdenum, selenium and zinc.

WARNINGS

This feed has been manufactured specifically for animals as described, do not feed to any other species of animal.

This product contains restricted animal material.

DO NOT FEED TO CATTLE, SHEEP, GOATS, DEER OR OTHER RUMINANTS.

Store in a cool dry place away from direct sunlight.
