

# Pullet 1106 Developer MP

**Pullet 1106 Developer MP** is a high quality grower food formulated to be fed to developing layer pullets from 6 weeks of age until point of lay.

It is nutritionally balanced for essential nutrients such as protein, energy, vitamins and minerals to ensure strong and healthy development.

**Pullet 1106 Developer MP** contains a high linoleic acid level of 1.3% to ensure the bird's body reserves are high going into lay (linoleic acid is an important nutrient for the enhancement of egg size).

**Pullet 1106 Developer MP** is manufactured in micro pellet form to ensure that they are easily consumed by young birds.

Lasalocid sodium is included in the diet for the prevention of the intestinal disease coccidiosis.
