## FEEDING RECOMMENDATIONS

The feeding rate of **Sheep Nuts** will vary depending on a number of factors such as body weight and condition, activity and quality of the roughage being fed.

Generally **Sheep Nuts** would be fed between 0.5% and 2% of body weight per day along with *ad.lib* roughage.

Introduce **Sheep Nuts** gradually and avoid sudden changes to diet as digestive problems may occur. If digestive problems occur reduce the amount of nuts being fed and increase roughage consumption until normal digestive activity resumes.

**Sheep Nuts** are not recommended for feeding to ewes in late pregnancy or lactation. Under these conditions please feed **Ewe & Lamb Nuts** or contact our technical personnel for alternative recommendations

**Sheep Nuts** can be fed to cattle.

Roughage and clean fresh water must be available at all times.
