HORSE & PONY

CALM NUTRITION

Cool Horse & Pony, the best value for cool & calm nutrition!

Cool Horse & Pony is a cool, nutritious and palatable horse food that can be fed to horses performing active strenuous work, pregnant and lactating mares, young growing horses and as a maintenance food for spelling and aged horses.

UNIQUE FORMULATION

Naturally the best!

Cool Horse & Pony has been scientifically formulated to ensure safe and highly efficient starch digestion in the small intestine.

Starch digestibility in the small intestine is very important to prevent digestive problems such as caecal acidosis which can lead to poor fibre digestion, diarrhoea, colic and laminitis.

Cool Horse & Pony has been manufactured to ensure the very best in nutritional digestibility, coolness and safety without the necessity to excessively heat process the food. While high temperature processing such as extrusion has some advantages there are also disadvantages such as high cost and detrimental heat damage to sensitive nutrients such as lysine, enzymes and vitamins.

Cool Horse & Pony is a highly nutritious diet that is not over processed giving you the best performance and value for money.

The way nature intended!

AGED HORSES

Caring for old friends!

Cool Horse & Pony is the ideal food for aged horses and those horses that have difficulty in adequately chewing their feed. The ingredients in **Cool Horse & Pony** have been specially processed to ensure that they do not require chewing for the horse to receive its full nutritional benefit. To further enhance nutrition intake particular attention has been made to ensure that **Cool Horse & Pony** is very palatable.

ELECTROLYTES

The right balance!

Cool Horse & Pony contains essential electrolytes to aid in the prevention of deficiencies, particularly potassium, sodium and chloride. Under normal conditions extra electrolyte supplementation will not be necessary. Where moderate to heavy sweating occurs it may be necessary to supplement extra sodium chloride (salt) and to a lesser extent potassium. This can be done cheaply and effectively without the necessity to buy expensive electrolyte mixes. Please contact our technical personnel for information on economical electrolyte replacement.

ENERGY & COOLNESS RATING

BALANCED LYSINE

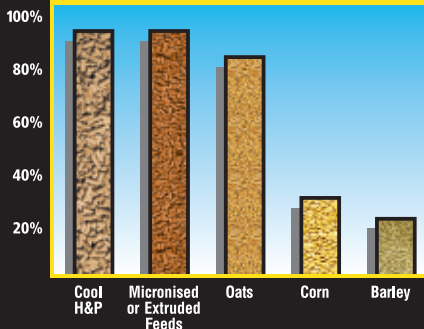

For strong muscle growth and recovery!

Protein is made up of components called amino acids, of which some must be provided via the diet and others are synthesised by the animal. Amino acids needed to be supplied via the diet are called essential amino acids, of these lysine is normally the one most likely to be in short supply.

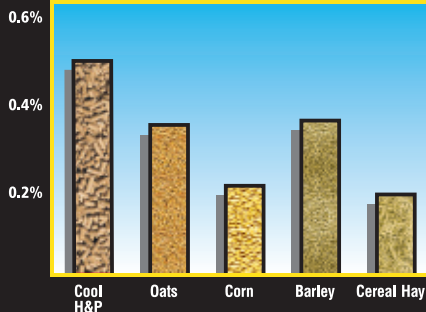

Cool Horse & Pony is balanced for essential amino acids, particularly lysine, and as can be seen in the "Lysine Content" chart contains a substantially higher level of lysine than typical horse feeds. The high lysine and balanced protein of **Cool Horse & Pony** ensures efficient protein utilisation, improved lactation in mares, strong growth in young horses, enhanced muscle tone and aids in muscle recovery after strenuous exercise.

STARCH DIGESTIBILITY

LYSINE

ANALYSIS & INGREDIENTS

PROTEIN 12 % min.

OIL & FAT 3% min.

FIBRE 16 % max.

Cool Horse & Pony has been formulated from a selection of the following ingredients or products derived from them: Bran, Pollard, Rice, Barley, Oats, Lupins, Peas, Beans, Canola, Soy, Sunflower, Safflower, Cotton and Vegetable Oil.

Micro Ingredients: Electrolytes, Vitamins and Minerals as listed below.

VITAMINS, MINERALS & ELECTROLYTES

Cool Horse & Pony fed at the rate of 7.0kg per day along with 4.5kg roughage will approximately provide the following levels of vitamins and minerals:

MINERALS & ELECTROLYTES

Calcium (Ca)	92	gm
Phosphorus (P)	55	gm
Magnesium (Mg)	37	gm
Sodium (Na)	37	gm
Chloride (Cl)	62	gm
Potassium (K)	125	gm

TRACE MINERALS

Iron (Fe)	1,975	mg
Copper (Cu)	165	mg
Manganese (Mn)	1,030	mg
Zinc (Zn)	825	mg
Cobalt (Co)	3,010	mcg
Iodine (I)	1,190	mcg
Selenium (Se)	2,340	mcg

VITAMINS

Vitamin A	159,750	iu
Vitamin D ₃	8,325	iu
Vitamin E	1,020	mg
Thiamine (B ₁)	82	mg
Riboflavin (B ₂)	91	mg
Pyridoxine (B ₆)	92	mg
Folic acid	32	mg
Pantothenic acid	168	mg
Niacin	762	mg
Choline	12,455	mg
Biotin	3,370	mcg
Vitamin B ₁₂	150	mcg

DAILY FEEDING CHART

	Horse weight	Cool H&P	Hay #
Intense work	450 kg	7.0 kg	4.5 kg
Moderate work	450	4.5	4.5
Light work	450	2.5	5.5
Maintenance	450	1.0	6.5
Weanling, moderate growth (6 months)	200	4.5	2.0
Weanling, rapid growth (6 months)	200	5.0	2.0
Yearlings, moderate growth (12 months)	300	4.5	3.0
Yearlings, rapid growth (12 months)	300	5.0	3.0
Long yearlings at rest (18 months)	365	4.0	4.0
Two year olds at rest	410	2.5	5.0
Two year olds in training	410	5.0	5.0
Early lactation	450	6.5	6.0
Late lactation	450	3.5	6.0
Pregnant mares (9 to 10 months)	450	1.5	6.5
Pregnant mares (11 months)	450	2.5	5.5
Breeding stallions	450	2.5	5.5

Do not feed more than approximately 0.80% of body weight (3.6kg for a 450kg horse) of **Cool Horse & Pony** in a single meal

Hay, chaff or pasture at 9% protein
